

FOOTWEAR FIT GUIDE

Finding the right shoe size is not always easy, especially since many brands have unique sizing. Please use this guide to find the right size for you, this way we can work together on reducing size related returns and reduce our environmental impact.

Directions to determine your shoe size:

Before you begin, put on socks that you will use with the particular style of footwear you would like to purchase.

- Place yourself against a wall or other 90 degree surface.
- Place the heel on a sheet of paper against the wall on a flat surface.
- Mark the end of the longest toe with a pen.
- Measure both feet and use the largest measurement.
- Read measurement and compare to size chart.

When comparing on the size chart, determine the closest measurement and use that number to determine your shoe in the centimeter column in our shoe size guide.

Please be aware that sizes can differ between brands, so make sure to consult the size guide of the item you want to purchase
