Sustainability at Boozt

Care-For Strategy

Our vision is to use our local Nordic position and our technology platforms to make sustainable choices easy for our customers and our partners. **Our Care-For strategy is our roadmap to becoming the leading responsible e-commerce company in the Nordics by 2025.**

We use data and technology to make sustainable choices easier, to achieve a greater impact, and to hold our operations to the highest standards. We rely strongly on collaborations with all of our stakeholders, and, more specifically in this case, our brand partners.

Made With Care Assortment

Our Made With Care assortment combines all styles that comply with **Boozt sustainability criteria.**

We want this category to represent a **genuine systemic change in production patterns** that educates the customer about the socio-environmental impact of Beauty's production and consumption.

Therefore, to ensure a reliable, transparent, traceable, and genuine assortment, we rely intensely on globally recognized certifications, as well as extensive data collection.

Beauty Criteria Overview

In 2023, we accept Beauty products in the Made With Care category when:

ENVIRONMENTAL REQUIREMENTS

Ingredients are safe for human and environmental health.

SOCIAL REQUIREMENTS

Manufacturing is socially responsible, respecting the workers rights, health and safety.

Environmental Requirements

Why are we requesting this data?

Ingredients are safe for human and environmental health.

What is the requirement based upon?

Human toxicity

As cosmetic products are applied directly onto the skin, it is important for us, at Boozt, to remain transparent about the ingredients list to ensure products sold in the Made With Care category represent a curated selection of products that are not composed of controversial ingredients. The European Union already protects customers from the most toxic ingredients, by limiting their use or banning them. However, some ingredients still present some risks to human health.

Ecotoxicity

Ecotoxicity looks at ecologic toxicology, meaning the potential biological, chemical or physical aspects of toxicants and how they can affect ecosystems and their health. Those substances can lead to serious and long term irreversible consequences on the environment, specifically aquatic life, indirectly affecting human health and quality of life. Other ecotoxic consequences from cosmetics ingredients include poor freshwater quality, biodiversity loss, coral bleaching...

PROHIBITED INGREDIENTS

- Aluminum salts
- BHA&BHT
- Coal Tar dyes - (CI - 00000)
- Diethanolamine - DEA related ingredients
- Formaldehyde releasing
- Parabens
- Phthalates
- Propylene glycol (alcohol)
- Sulfates - SLS & SLES
- PEG Compounds - polyethylene glycols
- Mineral Oils / Petrolatum
- Siloxanes (incl. Silicones)
- Talc - Talcum
- Triclosan - TCS

Cosmetics containing any of those ingredients will be **excluded** from our *Made With Care* Category.

Social Requirements

Why are we requesting this data?

It is important for us to ensure that garment makers throughout the supply chain have the following rights and treatments (this list contains the core labour rights, identified in amfori BSCI Code of Conduct, drawing on ILO, UN and OECD standards):

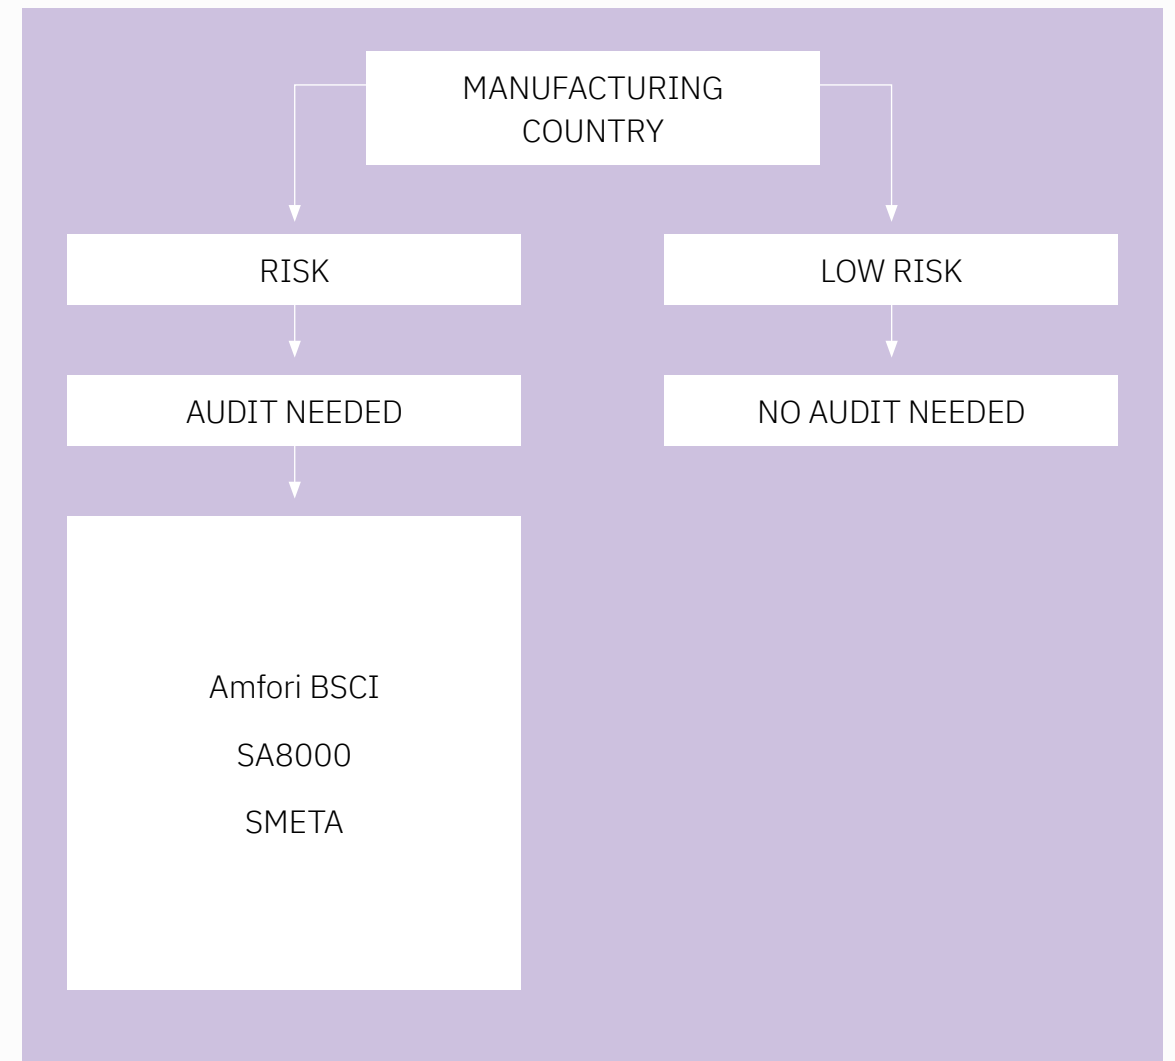

- Occupational health and safety (OHS)
- Special Protection for young workers
- No bonded labor
- Ethical business behavior
- No Discrimination
- Decent working hours
- No Child labour
- No precarious employment

What is the requirement based upon?

The social requirements focus on the risk classification of the manufacturing country, whether it is considered a risk or low risk country, as per amfori BSCI “Countries Risk Classification 2022”.

Where can I find complementary information?

For each risk category, a list of countries is presented, as well as the necessary certifications and practices.

Our Commitment

OUR COMMITMENTS

The foundation of our Care-For strategy is built upon our commitments which are the result of our sustainability efforts over the years. These commitments have become integral to how we strive to run our business and where we continue to invest time and resources. Boozt Sustainability Criteria targets two of those commitments:

SUSTAINABLE CONSUMPTION

Facilitate responsible consumer behavior

HIGHEST REQUIREMENT

Industry leading criteria for sustainability category

Contact

At Boozt, we believe in the power of collaboration to bring out meaningful change. We invite you to shape Boozt sustainability criteria by sharing your knowledge and expertise, as well as certifications or sustainable materials not mentioned here that can be subject to the Made With Care category to expand the lists of recommendations and resources. With our Boozt Sustainability Criteria we strive for a better future, industry-wide.

For more detailed information on Boozt Footwear Criteria, please check the full report.

For further information, and/or feedback, please contact madewithcare@boozt.com.
